Sir:

Listed on accompanying Form PTO-1449 are four documents that may be considered material to the examination of this application, in compliance with the duty of disclosure requirements of 37 C.F.R. §§ 1.56, 1.97 and 1.98.

In view of the fact that the claims of the instant application have been allowed, Applicants provide the following comments regarding why it believes the four documents disclosed herein are not relevant to patentability:

1. **WO 00/50889** discloses a data processing system and method for managing and presenting information derived from a differential expression of genetic information which can be used to model a physiological response of biological cells. WO 00/50889 does not disclose or suggest methods or systems for analyzing chemical genomic data that comprise user selection of a product associated with product information from a database.

2. **WO 99/58720** discloses methods for quantifying the relatedness of a first and second gene expression profile that are useful for quantifying the relatedness of environmental conditions upon a cell. WO 99/58720 does not disclose or suggest

methods or systems for analyzing chemical genomic data that comprise user selection of a product associated with product information from a database.

3. **Weinstein *et al.***, disclose the use of a large database of compound screening data and information intensive methods for identifying new clinically active agents for the treatment of cancer. Weinstein *et al.*, does not disclose or suggest methods or systems for analyzing chemical genomic data that comprise user selection of a product associated with product information from a database.

4. **Sorace *et al.***, disclose a database storing functional information regarding the changes of cellular gene expression information regarding the changes of cellular gene expression associated with various stimuli, and supports queries linking cell types, expressed genes and inducers. Sorace *et al.*, does not disclose or suggest methods or systems for analyzing chemical genomic data that comprise user selection of a product associated with product information from a database.

Where the publication date of a listed document does not provide a month of publication, the year of publication of the listed document is sufficiently earlier than the effective U.S. filing date and any foreign priority date so that the month of publication is not in issue. Applicants have listed publication dates on the attached PTO-1449 based on information presently available to the undersigned. However, the listed publication dates should not be construed as an admission that the information was actually published on the date indicated.

Applicants reserve the right to establish the patentability of the claimed invention over any of the information provided herewith, and/or to prove that this information may not be prior art, and/or to prove that this information may not be enabling for the teachings purportedly offered.

This statement should not be construed as a representation that a search has been made, or that information more material to the examination of the present patent application does not exist. The Examiner is specifically requested not to rely solely on the material submitted herewith. It is further understood that the Examiner will consider information that had been cited by or submitted to the U.S. Patent and Trademark Office in a prior application relied on under 35 U.S.C. § 120. 1138 OG 37, 38 (May 19, 1992).
